

PRESS RELEASE

November 2, 2009

VERNON MAILBOXES AND TOWN SNOWPLOWS

As a reminder, all mailboxes are to be securely fastened to a sturdy post that is sufficiently anchored in the ground to resist the impact of plowed snow or slush. The height of the bottom of the mailbox should be between 42 and 48 inches off the ground and the front of the mailbox should be even with the curb and should not extend past the curb. The Public Works Department will not repair or replace mail boxes or posts damaged by snow or slush coming off the plows.

For any information, please check our web site at **vernon-ct.gov**.
